Data Sources

American Cancer Society

Cancer Statistics Center provides data by state and cancer type and other metrics.

<https://cancerstatisticscenter.cancer.org/#!/page/publications/>

County Health Rankings and Roadmaps

The annual rankings provide a revealing snapshot of how health is influenced by where we live, learn, work, and play. They provide a starting point for change in communities.

<https://www.countyhealthrankings.org/>

Georgia Health Data Hub

The Georgia Rural Health Innovation Center's data hub blends powerful data tools and extreme ease of use to give our users an unprecedented amount of information in a single location. New data from a variety of sources are being added on a regular basis producing an even more powerful resource.

<https://www.georgiaruralhealth.org/rural-health-information/health-indicators-report/>

OASIS - (Online Analytical Statistical Information System)

The Georgia Department of Public Health's health indicator tool, OASIS provides a variety of health statistics and indicators from vital records, hospital discharge, ER visit, STD, Census population counts and other data, in tabular, mapped, or charted form.

<https://oasis.state.ga.us/>

State Cancer Profiles

Dynamic views of statewide and county-level cancer statistics for prioritizing cancer control efforts across the nation.

<https://statecancerprofiles.cancer.gov/>

U.S. Cancer Statistics

U.S. cancer statistics provided through a data visualization tool, public use database, and other tools.

Evidence-based Interventions and Implementation Science Tools

Transforming Research into Community and Clinical Practice: Evidence-Based Cancer Control Programs

A searchable database of evidence-based cancer control programs designed to provide program planners and public health practitioners easy and immediate access to program materials.

<https://ebccp.cancercontrol.cancer.gov/index.do>

Guide to Community Preventive Services (The Community Guide)

The Guide to Community Preventive Services (The Community Guide) is a collection of evidence-based findings of the Community Preventive Services Task Force. It is a resource to help you select interventions to improve health and prevent disease in your state, community, community organization, business, healthcare organization, or school.

<https://www.thecommunityguide.org/>

Research and Practice Tools

Select articles that provide a broad understanding of implementation science, as well as resources to help advance implementation science, including research tools, practice tools, research-practice partnerships, and an orientation webinar on dissemination and implementation.

<https://cancercontrol.cancer.gov/is/tools/>

U.S. Preventive Services Task Force

The U.S. Preventive Services Task Force is an independent, volunteer panel of national experts in disease prevention and evidence-based medicine. The Task Force works to improve the health of people nationwide by making evidence-based recommendations about clinical preventive services.

Guides to Community-Engaged Research

A Resource Guide to Community-Engaged Research

Winship Cancer Institute Community Outreach and Engagement Program offers this resource guide with tips for researchers and community-based organizations interested in forming productive and sustainable partnerships for community-engaged research.

<https://winshipcancer.emory.edu/files/research-files/coe-files/guide-to-community-engaged-research.pdf>

Toolbox for Conducting Community-Engaged Research

Scripps Translational Science Institute and Scripps Whittier Diabetes Institute provides researchers and community partners with tools for every phase of a community-engaged research project.

https://www.scripps.edu/_files/pdfs/science-medicine/translational-institute/community-engagement/training-and-tools/Community_Engaged_Research_Toolbox.pdf

Community-Engaged Research: A Quick Start Guide for Researchers

Created by Community Engagement Program, Clinical & Translational Science Institute, University of California San Francisco, this Quick-Start Guide is intended for academic researchers who are interested in community-based partnerships for research.

https://accelerate.ucsf.edu/files/CE/guide_for_researchers.pdf

Community-Based Participatory Research: A Strategy for Building Healthy Communities and Promoting Health through Policy Change

Developed by Policy Link and the University of California-Berkely School of Public Health, this guide provides a detailed introduction to community-based participatory research.

<https://www.policylink.org/sites/default/files/CBPR.pdf>

Patient/Survivor Education Materials

American Cancer Society

Easy-to-read materials on a variety of topics including prevention and early detection, treatment, side effects, and survivorship.

<https://www.cancer.org/health-care-professionals/patient-education-materials-for-professionals.html>

CancerCare

Easy-to-read booklets and fact sheets provide reliable information on cancer-related topics. CancerCare also offers educational workshops by phone or online.

<https://www.cancercare.org/publications#.html>

CancerQuest

CancerQuest is a web-based cancer education and outreach program at Emory University-Winship Cancer Institute, designed to provide reliable information about cancer biology and treatment. <https://www.cancerquest.org/patients>.

View videos that explain cancer-related terms that patients should know at <https://www.cancerquest.org/media-center/videos/cancer-treatment-terms>

Georgia CORE

Based on a statewide needs assessment survey of 800 cancer survivors, Georgia CORE offers educational materials that address the physical, practical, spiritual and emotional needs of cancer survivors.

<https://www.georgiacancerinfo.org/cancer-news/georgia/new-survivorship-materials-available/783>

National Cancer Institute

NCI's patient educational materials, available in a variety of formats.

<https://www.cancer.gov/publications/patient-education>

Georgia Statewide Cancer Control, Research and Advocacy Collaboratives

Georgia Cancer Control Consortium (GC3)

Georgia's Cancer Control Consortium is made up of more than 80 member organizations and individuals from across the state of Georgia, working together since 2006 to improve cancer prevention efforts and treatment outcomes. Members participate in collaborative work groups, committees and roundtables focused on the cancer control continuum including prevention, screening and early detection, diagnosis, staging and treatment, palliative care, and survivorship. GC3 created the state's first comprehensive cancer control plan in 2007 and subsequent revisions to guide cancer control efforts through 2024. For more information contact Chris Parker, Georgia Health Policy Center, at: chrisparker@gsu.edu.

Georgia CORE

The Georgia CORE (Center for Oncology Research and Education) is a public-private partnership that connects providers, researchers, organizations, advocates, and other leaders to build and nurture collaboration that increases access to innovative resources, research and personalized cancer care and support for patients, survivors, and caregivers. Its Online Cancer Information Center offers information on research and clinical trials, genetic screening for breast and ovarian cancer, patient navigation, cancer survivorship, and other topics. <https://www.georgiacancerinfo.org/>

Georgia Society of Clinical Oncology (GASCO)

GASCO is a statewide professional society of physicians, practice administrators and affiliated healthcare professionals concerned with clinical oncology. GASCO is committed to serving the needs of oncology providers in order to ensure delivery of the highest quality of compassionate cancer care. <https://www.gasco.us/index.php>

Regional Cancer Coalitions of Georgia

The Regional Cancer Coalitions of Georgia were created in 2002 by the Georgia General Assembly and Governor to ensure Georgians in all corners of the state have access to cancer care resources. These coalitions – now based in Albany, Athens, Columbus, Macon, and Rome – work hand in hand to provide prevention, screening, and care coordination to virtually all the state's rural population. <https://www.georgiacancer.org/>
